

# LET'S SUPPORT THE GREENS TOGETHER!

## January 26th, 2020

### **LET'S IMPROVE MÖDLING'S CITY CLIMATE**

What's a "good" city climate? Healthy nature and a clean environment. Green open spaces within the city's boundaries as well as uncultivated areas are of the utmost importance for the appearance of the city and the landscape in general as well as the microclimate.

How can we all contribute to a good city climate? Use energy efficiently. Use renewable resources like sun, wind, water, biomass and ground heat – that's the key.

**PROTECT THE ENVIRONMENT AND CLIMATE – PRESERVE OPEN GREEN SPACES – EFFICIENT USE OF ENERGY– DEVELOP THE CITY FOR THE FUTURE – PROTECT THE ENVIRONMENT AND THE CLIMATE**

### **DIVERSITY AS RESOURCE**

We want all inhabitants of this town to have a voice. Children, people with special needs, young people, senior citizens, immigrants – many have special requirements and for some it is difficult to make themselves get heard. We are convinced that diversity creates many opportunities and enriches a city's life.

Mödling is great city to live in and offers well developed infrastructure though confined in space – which gives room to real estate speculation on the private market. Our aim is to create affordable housing without compromising on quality.

**LIVE TOGETHER IN SOLIDARITY – SUPPORT THE ECONOMY'S VERY OWN CHARACTERISTICS – ENABLE INNOVATIVE CULTURE – ASSUME RESPONSIBILITY TOGETHER**

### **GREEN MOBILITY**

We want to live in a city where people find it easy to move around.

We want to establish new and smart mobility concepts instead of the outdated ones. More space for pedestrians and bicyclists, better public transports. To create easy access to public buildings, streets and places, let's ask people with special needs to help us planning. Their knowledge and day-to-day experience are crucial.

**EASY ACCESS FOR EVERYBODY – STREETS WILL BE AREAS OF ENCOUNTERS AND ADVENTURES AGAIN – SMART CONCEPTS FOR MOBILITY**

### **HOW MY CITY WORKS**

The Greens stand for transparency: we act responsibly and sustainably.

We want to plan together with all citizens – simpler processes and smart use of synergies. One main goal is to keep an eye on the city's finances. For that we need transparency – a responsible and sensible financial and investment planning, while always keeping an eye on follow-up costs.

The closer municipalities grow together, the closer we have to work together – to the benefit of an improved economy, ecology and efficiency.

PEOPLE-ORIENTED ADMINISTRATION – RESPONSIBLE MANAGEMENT – TRANSPARENCY AND REGIONAL COOPERATION – DEVELOP A CITY FIT FOR THE FUTURE
