

GREEN MOVES ON

GRÜN
GEHT WEITER

NATURALLY GREEN TAKE RESPONSIBILITY FOR A HEALTHY ENVIRONMENT

INTACT NATURE

Mödling should offer high quality of life because of its intact nature and clean environment – also for our next generation. Our ecological footprint plays a vital role for our city's ecological statement.

MAINTAIN GREEN SPACE

Green space – even uncultivated land and brushwood – is precious for the local appearance of either town or landscape as well as for the local climate. Permanently sealed soil ruins the ecological balance of the community and increases the exposure for flash flooding.

MÖDLING CAN DO BETTER

- Organic and regional products for Kinder gardens and nursery boards
- Diversity of seeds and protection of bees also within the community's in-house shops
- easier access to products from organic farming, e.g. organic wine
- reduction of particulate matter and ozone, e.g. within winter services
- maintaining "Eichkogel" as wildlife sanctuary is imperative.

ACTIVE TOWN SHAPING TOGETHER CREATING AND NUTURING NETWORKS

ECONOMY, CULTURE AND SOLIDARITY

A booming business environment with innovative entrepreneurs creates the floor for social and cultural life. Within the frames of urban development basic needs of all inhabitants shall be considered. Promotion of regional structures and small business units creates social networks. Thus we enhance a sustainable development of our town.

OUR MÖDLING OFFERS MORE

- affordable housing for young people
- space and parks invite to stay
- overall concept for culture
- local stores, delivery services or open market days in respective quarters
- promotion of small and retail shops
- little green recreational areas / shared gardening space
- merging generations via projects (e.g. delivery service for elder people)
- Pop-Up-Stores – temporary use of empty retail space

GREEN ON THE WAY

WE INTRODUCE NEW ENERGY

SMART USE OF ENERGY AS WELL SMART MOBILITY

We need attractive alternatives for motorised individual traffic to keep away commuting traffic and to maintain more space for pedestrians and cyclists. Main target is to reduce energy consumption.

OUR MÖDLING CAN DO MORE

- Apply latest state of the art technologies for energy- as well as CO₂-saving construction / renovation of buildings and procurement of vehicles for our municipal fleet.
- Green and attractive routing, public passages for pedestrians with no detours
- Pedestrian-, children-, cyclist-friendly streets without barriers
- More space to park your bicycles, e.g. east of the station
- Promotion of everyday's cycling
- Night-taxi from U6 to Mödling on weekends
- Planning of new traffic solutions in accordance with neighbouring communities

RESPONSIBLE GOVERNANCE

TRANSPARENCY AND INNOVATION

SUSTAINABLE FINANCIAL POLICY

ADMINISTRATION CLOSE TO OUR CITIZENS

Green policy stands for transparency and excellent civil service. Responsible, sustainable action for improved ecology and financial policy is our priority. Green carries on to improve processes within the administration and use synergies. Thus we thrive to reduce the burden of our community's debts.

OUR MÖDLING CAN DO MORE

- Reduce debts of our community step by step
- Proceed with the reform of our the administration
- Installation of a public citizen service centre at the council house
- Public procurement and staffing shall be done fair and transparent
- Cooperation with other communities when using infrastructure

GREEN GOES ON

RESPONSIBLE AND TARGET-ORIENTED FOR MÖDLING

After 20 years of opposition we have gained Know How in governance and introduced important concepts.

WE HAVE ACHIEVED:

More dialogue, re-naturalisation of our Mödling-creek, bringing back to life our "Haus der Jugend", more space for smart mobility, 20% reduction of our town's output of CO₂, 100 % eco-electricity, 100 kWp solar power on our own account, savings due to reform in our administration and as a consequence of transparent procurement, no additional credits and many more.

GOING ON FOR ENVIRONMENT AND QUALITY OF LIFE

More votes mean that we can reach our targets easier.
